Summary

Senior Android Engineer with 6+ years building secure, high-reliability, performance-critical apps. Led the Android team on Airtel Fiverse, a Google Maps (2D/3D) fiber planning tool used by field teams across 500+ cities, and raised Saregama Padhanisa (1M+ downloads) from 69% to 99% crash-free. Expert in Kotlin with experience supporting legacy Java, and strong across Jetpack Compose, XML, MVVM, Coroutines/Flow, and Hilt — with Bluetooth/BLE device integration, secure-coding and Jenkins CI/CD experience, and additional depth in Maps, ARCore, Filament, and 3D rendering.

Technical Skills

Languages	Kotlin (expert), Java (legacy), XML
Android	Jetpack Compose, XML Views, Coroutines & Flow, ViewModel, LiveData, Navigation & Compose Navigation, Room, WorkManager, Hilt/Dagger 2, lifecycle & state management, Material Design 3
Architecture	MVVM, MVP, MVI, Clean Architecture, modularization, build optimization
Networking & Data	Retrofit, OkHttp, WebSocket, GraphQL, RxJava
Connectivity & IoT	Bluetooth & BLE, real-time device telemetry, offline-first sync, GPS/location
Testing	JUnit, Mockito, MockK, Espresso, Compose UI Testing
CI/CD & Release	Jenkins, GitHub, GitLab, Gradle, Android App Bundles (AAB), Play Console, ProGuard/R8
Security & Monitoring	SSO, AES-256 encryption, secure coding, Firebase Crashlytics, LeakCanary, ANR reduction, memory profiling
Maps, AR & 3D	Google Maps SDK (2D/3D), geofencing, ARCore, Filament, GLB models, Android XR SDK
Media & Realtime	ExoPlayer, Camera2, MediaCodec, FFmpeg, 100ms, Agora, Socket.io, FCM
Tools	Android Studio, Git, Postman, Figma

Experience

Senior Software Engineer, InnovationM **Apr 2023 – Present**

Airtel Fiverse — enterprise fiber planning app (**Play Store**), 10K+ monthly active users

- Led a team of 5 Android developers — owning code reviews, mentoring, and work allocation — building a map-centric app for field agents across 500+ cities, covering survey, planning, and deployment workflows.
- Architected offline-first MVVM (Hilt, Coroutines/Flow, Retrofit/OkHttp) with Room and WorkManager sync for 500MB+ datasets; added SSO and telemetry, enforced modularization, shipped on Jenkins CI/CD, and maintained a 99.2% crash-free rate.
- Cut map rendering time by 60% with 10K+ markers by building custom clustering and viewport-based rendering; added polygons, polylines, custom overlays, and 3D building visualization on Google Maps SDK.
- Built the UI in Jetpack Compose (with XML interop) and 3D apartment models using ARCore, Filament, and the Android XR SDK, enabling virtual fiber-layout planning and reducing field site visits.
- Impact: survey accuracy improved from 75% to 94%, manual paperwork fell by 80%, and workflow time dropped by 40%.

Saregama Padhanisa — AI vocal training app (**Play Store**, 1M+ downloads, 4.5⋆)

- Took stability from 69% to 99% crash-free and removed 500+ ANRs by moving heavy work off the main thread and fixing lifecycle and threading issues.
- Integrated live video lessons with the 100ms SDK and a custom music SDK for real-time pitch detection and feedback.
- Built a waveform audio player on ExoPlayer, deep linking that cut navigation steps by 60%, and FCM notifications (96% delivery).
- Sped up feature delivery by 45% through modularization, cleaner module boundaries, and build optimization.

Mobile Engineer L1, Squareboat Solutions **Mar 2022 – Apr 2023**

- Led a team of 4 developers — running code reviews and mentoring — shipping apps to 100K+ users; cut load times by 25% with lazy loading and pagination, lifting engagement by 18%.
- **BharatCattle:** architected the Android livestock marketplace (MVVM, real-time listings, search and filters, payments, geolocation, Firebase). **Case Study**.
- **GoStops** (**Play Store**): built stay-discovery and booking features for a backpacker hostel app — property listings, search and filters, booking flow, in-app payments, and Google Maps-based location.
- **DRL MyFlexa** (**Play Store**): built telehealth features for 2K+ patients: video consults on ExoPlayer, appointment calendar, FCM reminders, and a Canvas-based pain heat-map across 10+ body zones.
- Reduced network calls by 35% with Room caching and added a WebSocket layer for real-time updates.

Software Developer, Techtonic Enterprise **Jun 2021 – Mar 2022**

- **ELD Truck:** built an Electronic Logging Device (ELD) app that streams real-time truck telemetry over Bluetooth/BLE, logs driving and vehicle data, and enforces EU driving-time and rest-period regulations (EC 561/2006)

to keep drivers compliant on the road.

- Managed the BLE connection lifecycle, parsed real-time sensor streams, and built an offline-first event log with a rule engine that tracks driving/rest thresholds and raises violation alerts to the driver.
- **Cengage Digital** (**Play Store**, 100K+ downloads, 4.4⋆): built an offline-first learning app for 15K+ students with Room caching, AES-256 encrypted downloads, QR-based resource access, ExoPlayer video, and Razorpay payments.
- Built a quiz engine with 8 question types and adaptive difficulty, handling 20K+ attempts per month.

Android Developer, Zappkode Solutions **Aug 2020 – Jun 2021**

- **CICR Cotton** (**Play Store**): built a farmer assistance app with Google Maps field mapping, offline Room storage, and Hindi/Marathi/English localization.

Education

B.E. Information Technology, K.D.K College of Engineering, Nagpur (CGPA 8.05) 2016 – 2020
HSC (Computer Science), G.B.M.M Junior College of Science, Hinganghat (65%) 2016
SSC, Bansilal Katariya High School, Hinganghat (66.36%) 2014

Awards & Certifications

- Aspiring Ace Award 2025 and Dedicated Spirit Award 2024, InnovationM
- Performer of the Quarter (Q4 2023), Squareboat Solutions; Red Hat Certified System Administrator (RHCSA)
